A DISTINGUISHED COUNTRY ESTATE

The Barn
A Remarkable Transformation

The Barn is an extraordinary transformation of the original structure, thoughtfully reimagined while introducing the comfort, quality, and conveniences of today. Some original exposed beams remain, complemented by reclaimed antique lumber, beautifully restored wood flooring, and exceptional craftsmanship throughout. The result is a space that feels authentic to its past yet entirely distinctive in its design. A one-of-a-kind destination within the property, thoughtfully created with exceptional vision and creativity.

Spanning multiple levels, the Barn was designed to accommodate both professional and personal use. Beautifully appointed offices, two private balconies, conference and gathering areas, a fully equipped quality kitchen, and expansive open spaces provide an impressive setting for business, entertaining, or simply enjoying time with family and friends. The upper level offers additional flexible living space, while the building's scale and character make it equally suited for intimate gatherings or memorable private events.

The expansive lower level adds yet another dimension. With generous space for an antique or collector car collection, motorcycles, recreational equipment, fitness, agro-tourism purposes, or workshop use, the possibilities are extensive. A full bath, dedicated dog-wash station along with large capacity washer and dryer, provide thoughtful conveniences, while an elevator and sophisticated building systems enhance functionality throughout all complemented by state of the art lighting scenes.

Every element of the Barn reflects an extraordinary level of vision, creativity, and attention to detail. From the massive timbers and antique materials to the unexpected modern amenities, it is difficult to fully appreciate the scale and craftsmanship without experiencing it in person.

A rare and exceptional offering where expansive meadows, beautiful woodlands, and breathtaking views come together in one extraordinary country setting.
